DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- Group I, claims 1, 39-45, and 53-56, drawn to simultaneous recovery of double or single sideband radio signals which are not mutually synchronized.
- Group II, claims 46-52, drawn to a method of providing an indication of receipt of a signal at a remote point by relaying the signal back to the sender and monitoring the level of the returned signal.
- Group III, claims 57-91, drawn communication among a group of devices using a preselected channel by selecting one device as a master and synchronizing the other devices to the master.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature of the Group I invention is receiving and demodulating a plurality of single or double sideband signals that are not mutually synchronized which is not present in Groups II or III. The special technical feature of the Group II invention is relaying the signal back to the sender and monitoring the level of the

returned signal which is not present in Groups I or III. The special technical feature of the Group III invention is selecting one of the devices in the group as a master and synchronizing the other devices to the master which is not present in Groups I or II.

3. A telephone call was made to Darin Gibby (Reg. No. 38464) on 9/19/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
